Please Read Carefully

This book is for educational purposes only. It is NOT financial, investment, legal, or tax advice.

Trading currencies involves high risk. You can lose some or all of your invested capital. Never trade with money you cannot afford to lose — rent money, medical funds, education fees, or borrowed money.

Past performance of any strategy, signal, bot, or trader is not a guarantee of future results. Markets change; edges come and go.

India-Specific Legal Note

Do: LEGAL in India: Currency Futures and Options traded on recognised Indian exchanges — NSE, BSE, MSE — in pairs such as USDINR, EURINR, GBPINR, JPYINR, and some cross-currency pairs (EURUSD, GBPUSD, USDJPY). These are regulated by SEBI and RBI.

Warning: NOT LEGAL in India for residents: Off-exchange (overseas / internet) leveraged spot currency trading through foreign brokers using margin/leverage. Under FEMA and RBI circulars, residents cannot send money abroad for such trading. Penalties can apply.

If you are an Indian resident, trade only through SEBI-registered brokers on recognised exchanges, or consider regulated prop-firm routes only after confirming legal/tax compliance with a chartered accountant.

Tip: When in doubt, consult a SEBI-registered investment advisor and a chartered accountant before putting real money at risk.
